# Mitsubishi Motors Environmental and Social Activities

## Mitsubishi Motors Social & Environmental Report 2005

### Note to Readers

Mitsubishi Motors Corp. (MMC) has published environmental sustainability reports in English and Japanese every year for the past six years. The inaugural publication was in September 1999. Although previous years' reports have included various information on social aspects, this year the title has been changed to reflect a sharper focus on the reporting of matters related to stakeholders in light of an enhanced recognition of corporate social responsibility. The aim of this report is to provide all stakeholders with a full and honest account of MMC's environmental and social activities.

Reference: Environmental Reporting Guidelines (2003), Japan's Ministry of Environment

### Scope of Report

- Environmental activities: MMC in Japan  
(Note: The report also includes the activities of some MMC affiliates)
- Social activities: MMC in Japan
- Economic data: MMC, Consolidated subsidiaries and Affiliates

### Reporting Period

- Fiscal 2004 (FY2004 : April 1, 2004–March 31, 2005)  
(Note: The report also includes some recent information from April 2005 onward)

This new philosophy underpins all corporate activities.</p> <p><b>Point 3</b></p> <p><b>Partial Revision of Environmental Sustainability Plan → P.13-14</b></p> <p>Although MMC has made progress in line with specific environment-related activities and goals contained in the Environmental Sustainability Plan published in 2002, MMC has made some revisions to the plan, notably in terms of extending some deadlines for performance targets. Efforts are being accelerated to attain medium-term goals.</p> <p><b>Point 4</b></p> <p><b>Electric Vehicle Development Program → P.23-24</b></p> <p>Mitsubishi Motors is focusing efforts on the development of electric vehicles (EVs) to create automobiles with ultra-low emissions. Field trials with a <i>Colt EV</i> prototype have been conducted to raise the performance of lithium-ion batteries. These high-performance batteries power innovative in-wheel motors at the heart of a design for the next generation of EVs (the MIEV project).</p> <p><b>Point 5</b></p> <p><b>"Corporate Ethics Compliance First" Declaration → P.39</b></p> <p>In June 2004, former chairman and chief executive officer Mr. Yoichiro Okazaki and former president and chief operating officer Mr. Hideyasu Tagaya announced a new declaration by senior management to prioritize compliance with corporate ethics. Fiscal 2004 marked the start of a new action program. Mr. Osamu Masuko, who was appointed president of MMC in January 2005, reaffirmed this compliance-first declaration on March 18, 2005 upon his appointment as Chief Business Ethics Officer (CBEO). Programs are ongoing to ensure that compliance is placed at the forefront of business.</p> <p><b>Point 6</b></p> <p><b>Sale of LEVs → P.57</b></p> <p>MMC has launched new versions of the <i>Colt</i>, <i>Colt Plus</i> and <i>Lancer</i> series with exhaust emissions that are 75% lower than the 2005 Japanese emission standards. This performance qualifies these models for a SULEV (Super Ultra Low Emission Vehicle) rating from the Japanese government. In the minicar segment, the latest models in the <i>eK</i> series have also attained a SULEV rating in recognition of similarly large reductions in exhaust emissions.</p>
