

## How to make eKWAGON (07)

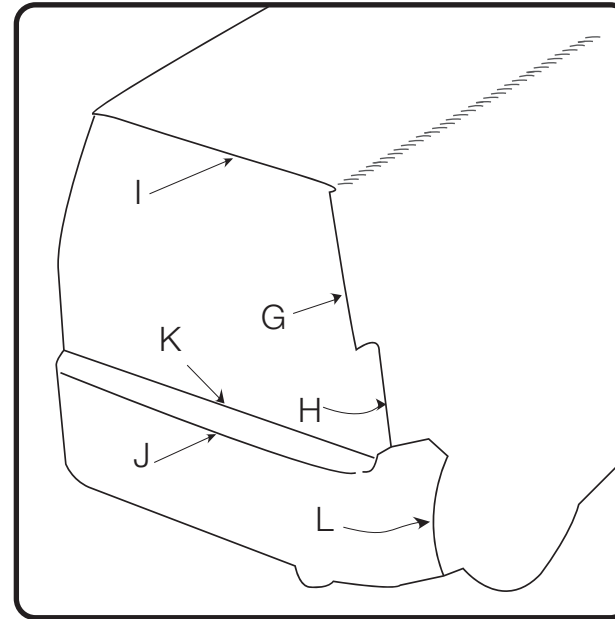

Use a sharp pair of scissors to cut the parts along the outline.

The \* marks within the thick border are glue flaps.

Do not fold all glue flaps. Read the instructions carefully as you build.

- A. Cut to the roof line, make the glue flap round without folding it, and glue on.
- B. Attach the bumper roundly so this line is aligned.
- C. Create a cut and roundly glue on the light.
- D. Create a cut into the hood and glue on so the line overlaps.
- E. Mountain fold the flap and glue on.
- F. Valley fold the window flap and glue on.

- G. Mountain fold the flap and glue on.
- H. Glue on so the light connects to the side.
- I. Mountain fold the flap and glue on.
- J. Mountain fold.
- K. Valley fold.
- L. Attach the bumper roundly so this line is aligned.
