

How to make GALANT FORTIS

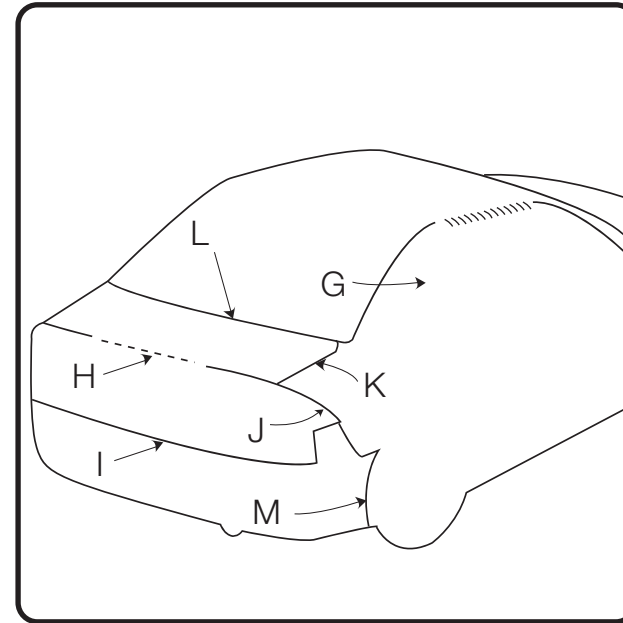

Use a sharp pair of scissors to cut the parts along the outline.

The * marks within the thick border are glue flaps.

Do not fold all glue flaps. Read the instructions carefully as you build.

- A. Cut to the roof line, make the glue flap round without folding it, and glue on.
- B. Attach the fender roundly without folding the glue flap.
- C. Valley fold the flap and glue on.
- D. Attach the bumper roundly so this line is aligned.
- E. Attach the light to the reverse side of the hood so it fits inside.
- F. With the separated parts, carefully valley fold the glue flap in the back and mountain fold the flap in the front to attach the light, grill, and bumper.

- G. Do not fold the glue flap but roundly attach it.
- H. Mountain fold.
- I. Align this line as you glue on without folding it.
- J. Fold the light and attach it to fit the fender.
- K. Do not fold the glue flap but roundly attach it.
- L. Valley fold the flap and glue on.
- M. Attach the bumper roundly so this line is aligned.
