

## How to make LANCEREVOLUTION VIII MR

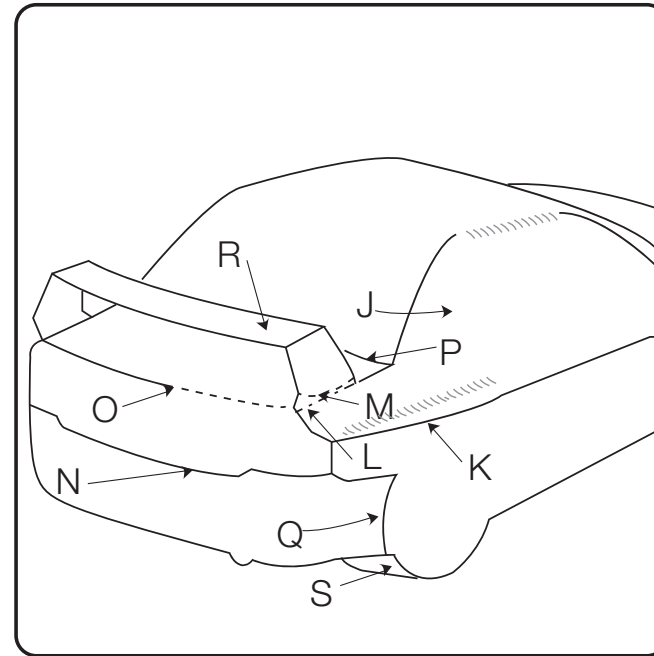

Use a sharp pair of scissors to cut the parts along the outline.

The \* marks within the thick border are glue flaps.

Do not fold all glue flaps. Read the instructions carefully as you build.

- A. Cut to the roof line, make the glue flap round without folding it, and glue on.
- B. Mountain fold the flap and glue on.
- C. Mountain fold the fender and attach it so that it creates a lump.
- D. Cut to this point and make the front tip of the hood round, and glue on.
- E. Glue on so this line is aligned.
- F. Cut to this point and roundly attach the bumper.
- G. Valley fold the flap and glue on.
- H. Attach the hood to the fender and smoothly glue on the light.
- I. Glue on so this line is aligned.

- J. Do not fold the glue flap but roundly attach it.
- K. Mountain fold the fender and attach it so that it creates a lump.
- L. Valley fold the root of the wing stay.
- M. Mountain fold this line, and fold the stay.
- N. Glue on so this line is aligned.
- O. Cut to this point, mountain fold then glue on.
- P. Valley fold the flap and glue on.
- Q. Glue on so this line is aligned.
- R. Mountain fold the wing and apply glue on to the reverse side, Then, valley fold both ends of the stay and attach the wing to the body.
- S. Make the tire tread round and glue on to the reverse side.
