

How to make PAJERO SHORT (05)

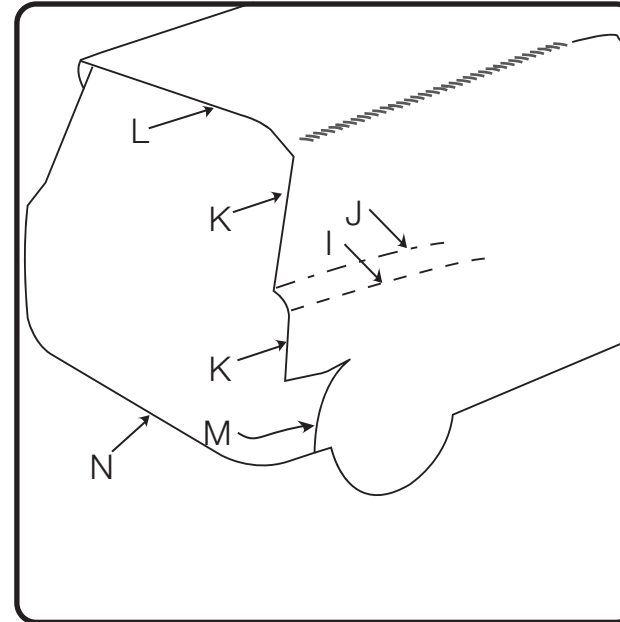

Use a sharp pair of scissors to cut the parts along the outline.

The * marks within the thick border are glue flaps.

Do not fold all glue flaps. Read the instructions carefully as you build.

- A. Cut to the roof line, make the glue flap round without folding it, and glue on.
- B. Cut to this point, and roundly attach the fender.
- C. Mountain fold.
- D. Valley fold the flap lightly and glue on.
- E. Mountain fold the glue flap, and glue onto the fender so it creates a bulge.
- F. Attach the bumper roundly so this line is aligned.
- G. Make the light round and glue on.
- H. Valley fold the window flap and glue on.

- I. Mountain fold the character line.
- J. Valley fold the line below the window.
- K. Mountain fold the flap and glue on.
- L. Glue the window onto the rear part of the spoiler.
- M. Attach the bumper roundly so this line is aligned.
- N. Mountain fold the part under the bumper.
