**DIMENSIONAL VIEWS**

[Images of dimensional views] All measurements in millimeters.
For More Active Urban Adventures.

Let the road become your playground in the new Mitsubishi ASX, a compact SUV built for powerful driving pleasure. From its fierce new face to functional new interior details, the ASX has been completely revamped to inspire unique urban adventures. So grip the wheel and feel the adrenaline rush as you cruise the streets in this elegantly rugged SUV.
INVECS-III CVT

The 2.0-liter engine is teamed with the INVECS-III (Intelligent & Innovative Vehicle Electronic Control System) CVT (Continuously Variable Transmission), ideally tuned to deliver effortless acceleration from any speed.

Color Liquid Crystal Multi-information Display

Attractively designed color liquid crystal multi-information display provides a useful readout of vehicle, trip and outside temperature. With a large, 3.3-inch size for improved visibility, this display makes it easy for drivers to stay informed.

Paddle Shifters & Cruise Control

Mounted within easy reach, the paddle shifters allow you to enjoy sporty control while keeping both hands on the wheel. Shifting is quick and easy, with up- and down-shifts requiring just a simple press once ASX is in “D” mode. For added convenience, the current gear position is clearly displayed on the multi-information display. Paddle shifters can also be equipped with cruise control, for greater performance on the road.

High Hip Point and Good Visibility

ASX provides a surprisingly elevated seat position that, with the sloping hood design, gives a better view of the road for easier manoeuvring and greater safety. The raised hip point also allows for smoother entrances and exits, and greater comfort.

Link System

The Link system connects external devices with the vehicle’s systems. Devices connected to the USB port or via Bluetooth®, such as mobile phones or MP3 players, may be controlled via the on-board switch or by voice command.

USB Port

The USB port allows you to connect your portable media player and enjoy your full music library in premium quality.

Bluetooth® Hands-free Kit

Keep in touch while keeping safely in control with the hands-free kit. Link your Bluetooth®-compatible mobile phone, and the voice-activated dialer lets you make calls while holding the wheel.

Note: The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by MITSUBISHI MOTORS CORPORATION is under license.
Your Natural Environment

With all the work that has gone into condensing ASX to just the right size for active driving fun, you may be surprised at all the spacious comfort that awaits you and your passengers inside. Rear seat passengers will be impressed with the leg- and headroom, and everyone will enjoy the soothing upholstery, available in tucansen leather or soft fabric. Numerous storage compartments have been placed throughout the interior, giving you plenty of room for all the extras you want to take along.

Center Console with Stitched Soft Touch Knee Pad

Smooth Synthetic Leather Door Trim Insert

Panoramic Glass Roof with Interior LED Illumination

The panoramic glass roof adds a new dimension to the drive, allowing you and your passengers to enjoy the view from every direction. Retracting the sunshade reveals a full-size glass roof panel extending over the front and rear seats. At night, the roof is attractively illuminated with LED lamps.

Floor Console with Cup Holder

Front Center Armrest
Upper Compartment

Front Center Armrest
Lower Compartment

The front center armrest has been equipped with a socket, allowing you to power your device anytime you need them, while the compartment can be used either with or without the removable tray depending on your usage.
Active Performance

**MIVEC Engine**

ASX’s 2.0-liter powerhouse uses a lightweight aluminum block for optimum performance as it puts out 110 kW (150 PS) to take control of city streets and open highways alike. MIVEC (Mitsubishi Innovative Valve timing Electronic Control system) technology provides optimal valve timing at both low and high rev ranges, to give the most of every curve and straightaway out there.

**Electronically Controlled 4WD**

Using one centrally located button, the system permits freely switching between 3 drive modes depending on driving condition or environment. Easily accessible on the floor console, the drive-mode selector button can quickly change the ASX’s drive mode from fuel-efficient 2WD, to 4WD Lock Mode for mastering even demanding off-road or weather conditions.

**Suspensions**

ASX features MacPherson strut front and multi-link rear suspensions for smooth handling over rough roads. Shock absorbers and stabilizers are tuned for sporty, comfortable performance.

Room to Choose

**Cargo Capacity**

No matter where you’re headed, ASX lets you carry whatever you need for when you get there, with up to 358 liters of available cargo capacity with five passengers. The tailgate is wide enough to provide ample space for even the bulkiest items, and the low floor height makes it convenient to move heavy cargo in and out.

1,000 mm

1,510 mm

1,350 mm

1,510 mm

Full-flat Rear Seat / 60:40 Split Foldable Seatback

To carry even larger items, the rear seat can be folded down completely flat to create an expansive cargo space. The 60:40 split rear seat can also be partially folded down, giving you the room to carry bicycles or other extra-long items, while still having rear seating available.

809
Ready for Anything

Super Wide Range HID Headlamps

What you can’t see, can hurt you. To take more of the road out of the shadows, ASX features Super Wide Range HID (High Intensity Discharge) headlamps. When activated, the headlamp clusters send out broader beams of light, illuminating a much wider section of the road ahead.

7-Airbag System

So that you and your passengers can be safer in the event of a collision, ASX is equipped with a 7-airbag system to provide increased safety to every seat. The front seat occupants are protected by front airbags, plus an additional knee airbag for the driver to help protect the legs in a forward collision. In a side collision, the front occupants are protected by side airbags and occupants in both rows are protected by curtain airbags extending along the sides.

Hill Start Assist (HSA)

HSA prevents the vehicle from rolling backward by automatically braking when starting on an uphill slope.

Active Stability Control (ASC)

Stability Control Function
ASC uses onboard sensors to analyze the vehicle’s motion and identify lateral wheel slippage. By governing engine output and controlling braking to the appropriate wheels, ASC helps maintain stability and traction control.

Traction Control Function (TCL)
When wheel spin is detected, engine output is governed and braking force is applied to the spinning wheels to prevent driving torque loss.

Note: Hill Start Assist (HSA) is not a substitute for safe driving. Never rely solely on this function when driving on steep roads. Your vehicle may move backwards if the brake pedal is heavily loaded, or if road is very steep or slippery. This function is not designed to help the vehicle stopped to place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stalled position as an alternative to re-arming the brake pedals. Please see your owner’s manual for additional information.

Note: The selection and control capabilities of Forward Collision Mitigation (FCM) are supplemental only and do not prevent collisions in every situation. Please drive safely and do not rely solely on the system while driving. When the driving speed gap between your car and the car ahead exceeds 30 km/h, FCM cannot avoid a collision but will sound an alert to warn the driver of the danger of the collision. Since FCM has no function to maintain braking, the brake is released approximately 2 seconds after stopping. To prevent the vehicle from rolling thereafter, the driver may have to hold the brake pedal down. In some cases, FCM may not function if the driver takes actions for accident avoidance through steering or acceleration operation. Please see the owner’s manual for additional information.

Warning + braking assistance
Warning + auto braking
Warning + strong auto braking
Danger of collision
High danger of collision
Extremely high danger of collision

Lane Departure Warning (LDW)
This feature beeps and displays a warning if the vehicle drifts from its lane while the turn signals are not operating.

Note: Lane Departure Warning is not designed to warn riders associated with not looking ahead carefully (attention drawn to something on the side, absentmindedness, etc.) or poor visibility caused by bad weather etc. Keep steering your vehicle centred and drive safely. The system may not be able to detect the lane correctly in some conditions. Please see the owner’s manual for additional information.

Warning + braking assistance
Warning + auto braking
Warning + strong auto braking
Danger of collision
High danger of collision
Extremely high danger of collision

Automatic High-beam (AHB)
To increase safety, comfort and driving ease at night, the high beams automatically switch to low beams when vehicles are detected ahead and automatically switch back to high beams so you don’t have to remove your hand from the steering wheel to switch the beams manually.

Note: Automatic high beam may not be available under some road and weather conditions.

Glare - low beams
Brake pressure on the outer front wheel
Note: Automatic high beam may not be available under some road and weather conditions.

Note: Automatic high beam may not be available under some road and weather conditions.

High-beam
Low-beam
Normal HID headlamps
Super Wide Range HID headlamps

Forward Collision Mitigation System (FCM)
Helps prevent a frontal collision or reduce damage if the collision becomes unavoidable. Responds to vehicles and pedestrians via camera and laser radar.

Note: The detection and control capabilities of Forward Collision Mitigation (FCM) are supplemental only and do not prevent collisions in every situation. Please drive safely and do not rely solely on the system while driving. When the driving speed gap between your car and the car ahead exceeds 30 km/h, FCM cannot avoid a collision but will sound an alert to warn the driver of the danger of the collision. Since FCM has no function to maintain braking, the brake is released approximately 2 seconds after stopping. To prevent the vehicle from rolling thereafter, the driver may have to hold the brake pedal down. In some cases, FCM may not function if the driver takes actions for accident avoidance through steering or acceleration operation. Please see the owner’s manual for additional information.

Hill Start Assist (HSA)
When the brake pedal is depressed, the engine output is governed and braking force is applied to the spinning wheels to prevent driving torque loss.

Note: Hill Start Assist (HSA) is not a substitute for safe driving. Never rely solely on this function when driving on steep roads. Your vehicle may move backwards if the brake pedal is heavily loaded, or if road is very steep or slippery. This function is not designed to help the vehicle stopped to place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stalled position as an alternative to re-arming the brake pedals. Please see your owner’s manual for additional information.

Note: The selection and control capabilities of Automatic High-beam (AHB) are supplemental only and do not prevent collisions in every situation. Please drive safely and do not rely solely on these functions while driving. Be sure to use the same specified type and size of tires on all 4 wheels. Do not install any aftermarket limited slip differential on your vehicle. Please see the owner’s manual for additional information.
GLX (2WD/4WD)

Key features
- 16-inch alloy wheels with 16-inch full wheel covers
- Tire pressure monitoring
- Front/rear disc brakes
- Electric power steering / Tilt-adjustable steering column / Telescopic adjustment steering column
- 215/60R17 tires with 16-inch light alloy wheels
- Automatic headlight leveling device
- Standard: triple airbag system (front passenger's side), side airbags (driver's and front passenger's sides)
- Driver's seat power height adjuster
- Sunroof

STANDARD AND OPTIONAL EQUIPMENT

- 5-speed manual transmission (leather-wrapped shown, vinyl also available)
- Aluminum pedal
- Manually controlled air conditioner
- Fully automatic air conditioner with chrome dial
- Front seat heater (set option for leather seats)
- USB Port
- Engine Switch + Keyless Operation System
- Rockford Fosgate® 710 W premium sound system with AM/FM radio, CD players, center display with touch panel and 9 speakers
- Forward Collision Mitigation System (FCM) / Lane Departure Warning (LDW) / Automatic high-beam (AHB) / Auto rain-sensor
- LED daytime running lamp / Front fog lamp
- AM/FM radio, CD player and center display
- chrome exhaust finisher
- Chrome tailgate garnish
- Chrome exhaust finisher
